

Terms of Service Evidence

API client: **sabotage-minecraft**

Repository: <https://github.com/hakonikomoru/sabotage-minecraft>

Prepared: 2026-06-04

This document provides terms for the API client evidence package. The current tool is a local creator tool, not a public SaaS product.

Terms of Use

- sabotage-minecraft is a local live-stream interaction tool for a Minecraft Bedrock Dedicated Server mini-game.
- The tool is operated by the channel owner for their own authorized YouTube Live stream.
- Viewers may participate by sending supported commands in YouTube Live Chat, such as !slow, !blind, !chicken, !hole, and !block.
- The operator may enable, disable, rate-limit, or ignore commands for safety, moderation, and stream stability.
- The tool is provided as-is for stream interaction and testing. It is not a public hosted service with user accounts.

YouTube API Use

- The tool uses YouTube Data API v3 to read live chat messages from authorized live streams.
- Users should not submit sensitive personal information through chat commands.
- The tool does not modify YouTube content, upload videos, or manage third-party channels.
- All YouTube API usage is subject to YouTube API Services Terms of Service and Developer Policies.

Safety and Moderation

- Commands may be rate-limited by user and by command type.
- Strong or destructive effects are disabled by default in the MVP.
- The operator may stop the game, reset the arena, or disable YouTube polling at any time.
- The debug endpoint is intended only for development and local testing.

No Public Login Service

The API client does not provide a public web login, paid accounts, or enterprise tiers. OAuth authorization is used by the channel owner to authorize access to their own live chat.
